Professional Summary

Since the beginning of my career, I have dedicated myself to developing secure, scalable solutions that enhance efficiency and foster innovation. Beginning with my studio and postproduction designs that considered the talents of the user as well as maintaining signal integrity. I have continued to round my experience to cover all areas of design, most recently achieving a comprehensive knowledge of full-stack software development, authentication, and modular design, I combine precision with flexibility to deliver exceptional digital experiences. My methodology prioritizes security and usability, ensuring each project achieves a balance between reliability and visionary design. As I progress in cloud development and optimization, my goal is to provide solutions that empower businesses and improve user engagement.

Experience

Cloud Support Specialist
Freudenberg Medical | June 2021 – September 2024

- Spearheaded **cloud-based automation**, converting manual processes into digital workflows using SharePoint, Power Automate, and PowerApps.
- Supported **1,200 global users**, enabling efficient cross-site collaboration through Microsoft E5 solutions.
- Independently managed **10+ simultaneous projects**, engaging department heads to optimize business processes.
- Enhanced **workflow efficiency**, reducing repetitive tasks and improving data accuracy through automation initiatives.

Project Manager
Freudenberg Medical | May 2015 – May 2021

- Co-established and led the **Project Management Office (PMO)** to streamline project execution.
- Developed **custom SharePoint-based tools**, SOPs, and training materials to support PMO operations.
- Managed large-scale **SAP rollouts** and oversaw **5+ concurrent projects** with global teams of up to 50 members.
- Conducted **post-mortem analyses** to refine processes and drive continuous improvement.

SAP Data Migration Specialist

Freudenberg Medical | October 2013 – May 2015

- Led master data migration efforts for **global SAP implementations**, integrating data from ERP and non-ERP systems.
- Developed **data validation algorithms** to ensure successful SAP go-live events.
- Trained SMEs and stakeholders on **data migration strategies** and SAP dependencies.

Facility Support / Video Editor

Quark Entertainment | Nov 2012 – Oct 2013

- Edited weekly episodes for cable television while managing technical support for post-production.
- Negotiated **broadcast equipment purchases and maintenance contracts** to optimize production resources.

Implementation Engineer

NBC Channel 4 Burbank | Oct 2003 – Feb 2006

- Provided technical support for creative and corporate staff while overseeing procedural updates.
- Installed and configured **new video editing systems**, ensuring seamless integration with existing workflows.

Chief Engineer

Cimarron Bacon O'Brien | Sep 1997 – Feb 1999

- Restructured **company operations**, increasing production capacity by **35%** through technical optimizations.
- Conducted weekly meetings with the **CEO and department heads** to streamline workflows and reduce inefficiencies.

Technical Support / Assistant Editor

New Wave - Electric Entertainment | Jun 1993 – Jul 1997

- Started as a **production assistant**, quickly rising to Lead Technician and Operations Manager.
- Managed **40,000 sq. ft. office expansion**, overseeing IT infrastructure, editing suites, and AV installations.
- Provided **payroll management, post-production support**, and technical troubleshooting.

Education & Certifications

- **General Assembly** – Full Stack Software Development learning front and backend coding languages
- **Sony Video Institute & AVID Technology** – Broadcast Video Systems, Editing, Troubleshooting
- **AVID Technologies** – Video & Audio Editing, Practical Application of Technologies
- **DeVry University** – Low Voltage Circuits, Digital Circuits, Business Administration, Conflict Resolution

---

Skills & Expertise

Cloud & IT Solutions

- Microsoft 365 Cloud Computing (Azure, SharePoint)
- PowerApps & Automation Development
- AI/Copilot Prompt Engineering

Software Development
- Full-Stack Development (Node.js, React, Express, Vite, Django, JavaScript, ejs Templating, HTML)
- HTML, CSS, JavaScript
- Authentication Systems (RBAC, OAuth2)

Project Management & Leadership
- PMI PMBOK V5 Methodologies
- Client Communication & Stakeholder Engagement
- Training & Instructional Content Development

Data & Process Optimization
- Excel Macros & Pivot Tables
- Loop Integration & Risk Management
- Data Migration & System Architecture

Education

- University California Santa Barbara – BIPSY track, left after 1 year. (1991)
- Santa Monica City College – Associates of Science Degree in Mathematics. (1991- 1992)
- DeVry University – Digital Circuits, Business Administration, Conflict Resolution (1992-1994)

Technical Training & Certifications
- Sony Video Institute & AVID Technology – Broadcast Systems, Editing, Troubleshooting
- General Assembly Software Development – Full Stack Development, Authentication, PostgreSQL
- Microsoft 365 Cloud & Security Training – Endpoint Manager, Intune, SCCM Optimization

---

Skills & Expertise

Enterprise IT & Cloud Solutions
- Microsoft 365 Cloud Computing (Azure, SharePoint, Endpoint Manager)
- SCCM Administration & Migration to Intune
- AI-Powered Contract & Document Management (contractPOD, SAP DMS)

Software Development & Automation
- Full-Stack Development (Node.js, React, Express, JavaScript, Django, Authentication)
- PowerApps, Power Automate, SharePoint Optimization
- Business process conversions to cloud workflows
- Windows OS, Virtual Machine Deployments & Security

Project Leadership & Process Optimization
- Agile (Scrum, Kanban) / PMI PMBOK V5 Methodologies
- Stakeholder Communication & Client Engagement
- Training & Instructional Content Development

REFERENCES

- **David Spell – Freelance Writer & Producer 1992 - 2017**

  David collaborated with Kevin across multiple companies, including NBC and Electric Entertainment from 1992 to 2017

  "Kevin's attention to detail and vast technical knowledge would be an asset to any organization. He's also laser focused, can put complex projects in motion and keep teams on task. One of the things I like the best about Kevin is that he doesn't panic in a crisis. (I certainly don't share that trait!) If things go wrong Kevin can quickly devise a solution and get the job completed, and with a smile. Highly recommended."

- **Ben Manning - Software Engineer | Instructor January 21 to April 22, 2025**

  "I have had the pleasure of working with Kevin for three months as his instructor at General Assembly. During our time together, Kevin worked relentlessly to become a complete developer. He produced four complete (and creative) projects that highlighted his problem-solving abilities along with his curiosities in web development. Time and time again, Kevin displayed a drive to create the best applications he could, given the extreme constraints of a programming bootcamp. Kevin is a student that consistently sought out feedback regarding his progress and is always willing to improve his work based on feedback in a very quick and professional manner. Kevin will be a great asset to any development team that chooses to bring him aboard!"
